Project Charter
February 23, 2020

Project Title: Data Driven Web Application	
Project Start Date: February 2020	**Projected Finish Date:** May 2020

Project Manager: Ralph Anderson, Jr.
　　　　　912-980-2472
　　　　　randers4_gsou@go.view.usg.edu

Project Objectives: The main goal of the project is to develop a data driven Web-application that meets established specifications. Other project Objectives:

- Implement and apply current IT discipline-related concepts and practices.
- Identify and analyze organizational and individual problems or opportunities in the IT realm and define requirements for addressing them when an IT solution is appropriate.
- Design and develop effective, IT-based solution and integrate them into the user environment.
- Create and implement effective project plans.
- Identify and investigate current and emerging technologies and assess their applicability to address individual and organizational needs.
- Communicate effectively and efficiently to classmates and project sponsor

Success Criteria: Success is measured by product and project quality, timeliness, and degree of customer satisfaction.

Approach: The project will be conducted based on a generic systems development life cycle approach consisting of the following phases: Planning, Analysis, Design, Implementation, and Maintenance.

Roles and Responsibilities

Name and Signature	Role	Position	Contact Information
Ralph Anderson, Jr.	Project Manager, Full Stack	Student	912-980-2517 randers4_gsou@go.view.usg.edu

	Application Developer		
Mr. Jose Canedo	Project Sponsor	Instructor	Canedo_Jose_CSU@go.view.usg.edu

Comments: As the project manager, one of my goals is to keep all stakeholder informed of the project status. The goal will be accomplished by submitting weekly work log and publishing them on the project website. – Ralph Anderson, Jr.
